

## Magnetic Rail 20 Style Plaster-Mount Track, 2-Meter Length

### OVERVIEW

The S-TKFT-PM3-2M is a 20-style plaster-mount magnetic rail track section designed for recessed installation in drywall or plaster ceilings. At 2 meters in length, it is intended for use with compatible 20-style magnetic track lighting fixtures in commercial and architectural interior applications where a flush, concealed track profile is required.

Constructed from aluminum, the rail accepts an engroove width range of 31.5–52mm with an engroove depth greater than 43.2mm, allowing integration into a range of ceiling build-out thicknesses. The cross-section measures 30.2mm in height and 62.8mm in width, providing the structural geometry needed for proper plaster-in mounting.

### SPECIFICATIONS

<b>Material</b>	Aluminum	<b>Dimensions</b>	23mm W x 7mm H x 62.8mm D (profile cross-section); engroove width 31.5–52mm; engroove depth >43.2mm
