

Magnetic Track Rail L-Connector, Horizontal Corner for Plastering Applications

- Black finish for a discreet plaster-line appearance
- Plaster construction for flush integration into plastered ceilings or walls
- Compact 2.47 × 1.71 inch footprint
- Supports wall or pole mount track configurations
- Enables 90-degree horizontal corner transitions in track rail runs

OVERVIEW

The S-TKFT-PM3-HL is an L-connector accessory for horizontal corner joins in plastering-mounted magnetic track rail systems. It is used in plaster-in track lighting installations where a 90-degree horizontal transition is required between track rail sections.

The connector is finished in black and constructed of plaster to integrate flush with surrounding plastered surfaces. It measures 2.47 × 1.71 inches and mounts to wall or pole track configurations.

SPECIFICATIONS

MECHANICAL

Product Dimensions	2.47×1.71 inch
Finish	Black
Material	Plaster
Mounting	Wall/Pole Mount

APPLICATIONS

- Plaster-in ceiling track lighting layouts
- Commercial retail lighting corner transitions
- Architectural track lighting installations
- Wall-mounted magnetic track systems
