

Stripped Brass Switch for Commercial and Industrial Electrical Installations

- Constructed from brass for durability and conductivity
- Stripped brass finish suited to industrial-style installations
- Designed for commercial and industrial electrical applications

OVERVIEW

The SW-S is a stripped brass switch intended for use in commercial and industrial electrical and lighting installations. The brass construction offers a durable, conductive base suited to demanding environments where standard switch materials may not meet professional-grade requirements.

The stripped brass finish provides a raw metal surface that can be paired with vintage or industrial-style hardware assemblies.

SPECIFICATIONS

MECHANICAL

Finish	Stripped Brass
Material	Brass

APPLICATIONS

- Commercial electrical installations
- Industrial lighting control panels
- Vintage-style hardware assemblies
- Property management electrical retrofits
