

Smart Film Power Supply, 110V AC, 50W, Covers up to 74 sq ft

- Operates on 110V AC input power
- Rated output of 50W per unit
- Covers up to 74 sq ft of smart film per power supply
- Sold individually, one unit per package

OVERVIEW

The Smart Film Power Supply is a dedicated driver designed to power switchable smart film installations. It converts 110V AC input into the output required to drive smart film panels, with one unit rated to cover up to 74 square feet of film.

Selecting the correct unit requires knowing either the total wattage draw of the film panels or the number of individual film sections being controlled. Consult film specifications or contact Poli LED & Signs to confirm the appropriate supply for a given project.

SPECIFICATIONS

ELECTRICAL

Operating Voltage	110 V
Wattage	50 W

APPLICATIONS

- Switchable smart film partitions
- Smart glass conference room dividers
- Privacy film installations in offices
- Retail display switchable film systems
