

T5 Linking Cable for LED Strip Light Fixtures, 1 - Year Warranty

- Enables daisy-chain linking between T5 LED fixture runs
- Rated LED lifetime of 50,000 hours for connected fixtures
- Robust construction for protection against installation stresses
- Compatible with a wide range of connectors and devices
- Backed by a 1-year warranty

OVERVIEW

The T5 Linking Cable is a connecting cable designed for use with T5 LED strip light fixtures, enabling daisy-chain installation between fixture runs. It is suited for commercial and industrial lighting layouts where multiple fixtures must be linked in sequence.

The cable is constructed for durability and reliable signal and power transmission, with robust physical protection against installation stresses. It is compatible with a wide range of connectors and devices, supporting straightforward integration into existing fixture configurations.

The associated T5 fixture LEDs carry a rated lifetime of 50,000 hours, and the product is backed by a 1-year warranty.
